## HLTAID009 Provide Cardiopulmonary Resuscitation (CPR)

Cardiopulmonary Resuscitation (CPR) is the name given to the technique of combining external cardiac compressions with rescue breaths. CPR may be required in a range of situations, including community and workplace settings. This course provides the knowledge and skills needed to perform CPR in line with the Australian Resuscitation Council (ARC) guidelines.

### Course Content Summary

- Respond to an emergency situation
- Perform CPR (Cardiopulmonary Resuscitation)
- Defibrillator / AED Training
- Communicate details of the incident
- Preserve life
- Prevent illness, injury and conditions becoming worse
- Promote recovery
- Protect the casualty
