

## TLILIC0005: Licence to operate a boom-type elevating work platform (Boom greater than 11m)

The training to achieve this High-Risk Work Licence – (WP), consists of 3 components: formal theory training, supervised work experience and practical assessment. We offer two options to obtain the licence:

### **Option 1 – Boom-type elevating work platform WORK READY (3 days)**

This is a 3 day intensive training and assessment course. Participants will attend on all 3 days to complete theory, practical training and assessment with our qualified trainer and assessor.

This course option is suitable for participants without access to a workplace to gain experience, or workplaces who don't have the resources to supervise staff while gaining experience. Learners must meet a level of practical ability before undergoing a Workplace Health & Safety Queensland licensing practical assessment on the final day. If at any time, the assessor recognises the need for the participant to undergo additional training, participants will be given their log book to obtain additional experience in the workplace or offered further hours to complete at an additional practical training session(s). Should this be required, re-attendance fees may apply.

On successful completion of this course, you will receive a Statement of Attainment and the required paperwork to apply for a WH&S QLD HIGH RISK BOOM-TYPE ELEVATING WORK PLATFORM (WP) licence.

*Participants must be over the age of 18 and have a sound knowledge of the English language.*

### **Option 2 – Boom-type elevating work platform LOG BOOK (1 day + Assessment)**

Participants of this course will gain the required knowledge to safely and effectively operate a boom-type elevating work platform. They will then be provided a log book and are required to obtain and log hours via workplace experience. The log book will be required to be sighted by the accredited assessor prior to assessment. Participants are welcome to book in for assessment when they feel competent to undertake the mandated assessment.

**Please note:** It is up to the participant to organise their own access to operate a boom-type elevating work platform under the supervision of a licenced operator.

On successful completion of this course, you will receive a Statement of Attainment and the required paperwork to apply for a WH&S QLD HIGH RISK BOOM-TYPE ELEVATING WORK PLATFORM (WP) licence.

*Participants must be over the age of 18 and have a sound knowledge of the English language.*
