## TLILIC0008: Licence to operate a non-slewing mobile crane (Greater the 3 tonnes capacity)

The training to achieve this High Risk Work Licence consists of 3 stages: Formal theory training, supervised work experience (nominal hours) and assessment.

During the 2 day formal theory session participants will gain the required knowledge to safely and effectively operate a non-slewing mobile crane, after which they will be required to obtain and log 60 nominal hours via work experience. The participant must be supervised when performing duties by a person with an equivalent licence in non-slewing mobile crane operations.

A log book showing the completed nominal hours will be required to be sighted by the accredited assessor prior to assessment.

**Please note:** It is up to the participant to organise their own access to operate a non-slewing mobile crane under the supervision of a licenced operator and obtain the required nominal hours.

*Participants must be over the age of 18 and have a sound knowledge of the English language.*

### Course Content Summary
