RIIHAN309F Conduct Telescopic Materials Handler Operations

This Telehandler Course RIIHAN309F Conduct telescopic material handler operations unit is appropriate for those working in operational roles. Training will be completed with fork types, however if required, training can also be completed with other attachments such as crane jibs, earthmoving buckets, grabs etc.

This course does not cover the requirements for operating a slewing telehandler or for crane jib attachments with a lifting capacity over 3 tonnes.

This nationally accredited training consists of both theory and practical sessions.

Participants must have a sound knowledge of the English language.
